RAYEN FALEH

Cybersecurity final-year internship | Pentesting & detection

Master's student · 6 months from February 2027

Nabeul, Tunisia | +216 55 726 892 | ryan.elfaleh@gmail.com
Portfolio: rayenelfaleh.github.io | GitHub: rayenelfaleh
LinkedIn: linkedin.com/in/rayen-el-faleh-665a3a1bb

Cybersecurity master's student with lab experience in Linux/Windows/Active Directory pentesting and Wazuh/Sysmon detection, plus Java EE development with application security controls.

CYBERSECURITY PROJECTS

16 published CTF writeups — TryHackMe & HackTheBox
Public GitHub repository · github.com/rayenelfaleh/cybersec-writeups

- Wrote structured Linux/Windows pentest reports, some including defensive analysis: remediation and detection ideas.
- Documented Active Directory attack chains (Attacktive Directory, VulnNet: Active), including AS-REP roasting, DCSync and pass-the-hash.
- Exploited SQL injection (Appointment), LFI (Dogcat) and file upload vulnerabilities (RootMe) in labs.

Personal pentesting & detection lab
Personal project · 2026

- Deployed an ESXi lab with Kali Linux, Windows Server 2025, a Sophos firewall and SSL VPN.
- Executed an MS17-010 (EternalBlue) exploitation chain on Windows 7 and wrote a penetration test report.
- Mapped offensive scenarios to Wazuh/Sysmon rules (MITRE ATT&CK T1210).

WORK EXPERIENCE

Video editor & technical assistant
Almourabi E-learning · Apr – Sep 2026

- Edited 10–18 educational videos daily (up to 22), from processing Zoom recordings to publishing, using Camtasia and CapCut.
- Set up instructors' equipment and resolved technical issues during classes.

Web development intern — bachelor's final-year project
Tunisie Telecom · Nabeul · Feb – Jul 2025

- Built an employee health insurance management web app: Java EE (JSP/Servlets), MySQL, JDBC/DAO; separate role-based Administrator and Employee areas.
- Secured authentication with prepared statements, server-side input validation and BCrypt password hashing.
- Implemented password complexity requirements, email password resets and session invalidation on logout.

TECHNICAL SKILLS

Pentesting: Nmap, Metasploit, Burp Suite, Gobuster, Impacket, Evil-WinRM, Hashcat; Active Directory.
Detection & lab: Wazuh SIEM, Sysmon, MITRE ATT&CK; ESXi, Sophos, SSL VPN.
Development: Python, Bash, Java EE, MySQL, JDBC/DAO, Git, Docker.

EDUCATION

Master's in Computer Science — Cybersecurity specialisation
Faculté Leaders Nabeul · In progress · 2025 – 2027

Bachelor's degree in Computer Science
Faculté des Sciences de Tunis · 2021 – 2025

LANGUAGES

Arabic: native | French: fluent | English: fluent in writing, good basic speaking skills
